

SatAuth will remove the inconvenience of requesting your guests to pay cash for purchases in remote locations.

Let your customers enjoy the freedom to spend on their credit or debit cards – with NO floor limits, and NO risk!

Remove the cost of debt recovery, no auth – no sale !

Have you considered extending your product range but were limited by the risk ? SatAuth opens the opportunity for Merchants to offer MORE to their customers

Globally secure, real-time peace of mind

SatAuth and SAA a truly South African success

SatAuth with the Support of SAA and SAAT, have successfully tested the Innovative SatAuth Infrastructure Payment interface on their commercial aircraft.

Additional benefits provide independently powered real-time tracking facilities – customized to your preferred notification intervals !

Can you afford not to know where your high value assets are at all times ?

SatAuth Solution is not only a South African first EASA approved world class innovation, but is also commercially competitive, and can be installed within a standard CKA check

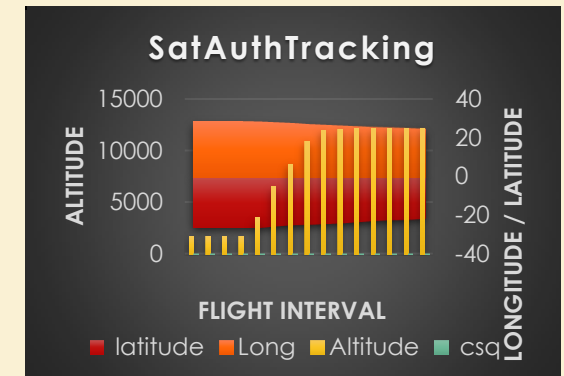

Primarily developed to address the risk of Duty-free credit card purchases in-flight, SatAuth is able to provide a product which can meet both your duty-free and discreet tracking requirements

Our solution includes:

- Realtime in-flight financial authorisation Interface
- Customisable Global Tracking
- Combination of both Realtime Financial transaction management and Global tracking

Our Global solution is fully supported by our Satellite Service provider
